Should the parties have cause to claim force majeure, the claiming party will notify the other party, in writing, of the cause(s) of such event, the anticipated duration of non-performance and the remedies being taken to eliminate the cause. Financial obligations relating to payment for or delivery of electricity under this Agreement cannot be cause for claiming force majeure and obligations cannot be excused as a result of a force majeure event.

18. LIABILITY – IN NO EVENT SHALL EITHER PARTY BE LIABLE FOR ANY PUNITIVE, INCIDENTAL, CONSEQUENTIAL, EXEMPLARY, INDIRECT, THIRD-PARTY CLAIMS OR OTHER DAMAGES WHETHER BASED ON CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE, OR FOR LOST PROFITS ARISING FROM A BREACH OF THIS AGREEMENT.

21. Binding Arbitration; Class Action Waiver. In the unlikely event that you have a dispute related to the supply of electricity that is not resolved to your satisfaction, or that we have a dispute with you and are unable to resolve it informally, we each agree to resolve such a dispute through binding arbitration before the American Arbitration Association ("AAA") under the Federal Arbitration Act ("FAA") or small claims court, instead of before any other court. We each agree to arbitrate solely on an individual basis, and understand and agree that this Agreement does not permit class arbitration or any claims brought as a plaintiff or class member in any class or representative arbitration proceeding. The arbitrator may not consolidate more than one person's claims, and may not otherwise preside over any form of a representative or class proceeding. YOU AGREE THAT, BY ENTERING INTO THIS AGREEMENT, YOU AND HARBORSIDE ENERGY ARE EACH WAIVING THE RIGHT TO A TRIAL BY JURY OR TO PARTICIPATE IN A CLASS ACTION OR TO SUE IN A COURT (OTHER THAN AN INDIVIDUAL ACTION IN SMALL CLAIMS COURT AS DESCRIBED HEREIN).

provided on an arm's length basis and market-based compensation is included in the price noted above.

25. Governing Law - This Agreement is governed by the laws of the Commonwealth of Massachusetts. This Agreement is subject to present and future legislation, orders, rules, regulations or decisions of a duly constituted governmental authority having jurisdiction over this Agreement or the services to be provided hereunder. 28. Severability - If any provision of this Agreement is held by a court or regulatory agency of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions shall continue in full force without being invalidated in any way.

29. Delay or Failure to Exercise Rights - No partial performance, delay or failure on our part in exercising any rights under this Agreement and no partial or single exercise thereof shall constitute a waiver of such rights or of any other rights hereunder.

30. Taxes and Laws - Except as otherwise provided in this Agreement or by law, all taxes due and payable with respect to service provided under this Agreement, other than taxes

Known Resources include resources that are owned by, or under contract to, the supplier. System Power represents power purchased in the regional electricity market. Biomass refers to power plants that are fueled by wood or other plant matter. Hydro resources of greater than 30 megawatts in size are deemed "large hydro." Air Emissions		Air Emissions: Emissions for each the following pollutants are presented from ISO New England System Mix Report. Carbon Dioxide (CO ₂) is released when fossil fuels (e.g., coal, oil and natural gas) are burned. Carbon dioxide, a greenhouse gas, is a major contributor to global warming. Nitrogen Oxides (NO _x) form when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (or smog), and may cause respiratory illness in children with frequent high level exposure. NO _x also contribute to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life. Sulfur Dioxide (SO ₂) is formed when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO ₂ include asthma, respiratory illness and aggravation of 2 existing cardiovascular disease. SO ₂ combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.
